

DIY SELF-SERVICE GUIDE

HOW TO REPLACE A SMARTTOUCH[®] HANDLE ON A SLIDING GLASS DOOR

Materials Required:

Phillips Screwdriver

Difficulty:

Medium

Time Requirement:

10 minutes

INSTRUCTIONS:

1. Unlock and open the sliding glass door.
2. Locate the screws on the interior side of the handle.
3. Using the Phillips head screwdriver remove both screws (while removing the second screw, hold on to the handle to make sure it does not fall onto the floor).

NOTE: Take note of the position of the handle is in before removal (locked or unlocked)

FIRM HOLD ON HANDLE

REMOVE SCREWS

4. Place the new handle in the original position (out and unlocked) and reinstall the two screws.

CORRECT HANDLE POSITION

PLACE HANDLE BACK IN

REINSTALL SCREWS
