

Milgard Installation Supplement

Rev. 12.19.2014

Tools and Materials You Will Need

A few simple hand tools will aid in installation. Refer to the specific installation method instructions for materials required.

Removal of Old Windows, Doors or Skylights

Some things to keep in mind when removing old products.

- Follow the EPA's Lead Renovation, Repair and Painting Rule (RRP Rule) which requires that firms performing renovation, repair, and painting projects that disturb lead-based paint in homes, child care facilities and pre-schools built before 1978 have their firm certified by EPA (or an EPA authorized state), use certified renovators who are trained by EPA-approved training providers and follow lead-safe work practices. For more information visit www.epa.gov/lead.
- When removing products from a building Milgard recommends that you follow local rules and regulations for disposal. Whenever possible, take window, door and skylight products or components to reuse or recycling centers and avoid disposing them in the landfill. Consult with your local recycling center for more information on programs in your area.

Installation Instructions

Milgard provides installation instructions for common new construction and replacement applications found at www.milgard.com. Some Milgard products have specific installation instructions which are also available on the website. For variations of these installation instructions or questions regarding alternative installation practices, call 1-800 MILGARD for more information.

Disclaimer: EPA makes no warranties, expressed or implied, nor assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of the contents of installation instructions, or any portion thereof. Further, EPA cannot be held liable for defects or deficiencies resulting from the proper or improper application of installation instructions.
