## **New Milgard® Moving Glass Wall Systems Bring a Touch of Luxury to More Homes**

*Standard systems allow homeowners to bridge indoor and outdoor living*

**Tacoma WA (July 8, 2013)** – Milgard Windows & Doors has opened up an entirely new way to look at luxury by introducing [Moving Glass Wall Systems](#). This innovative glass wall system blurs the line between inside and out of the question. Typically, moving glass walls were only considered for high-end custom homes, until Milgard reframed the conversation. Homeowners can now choose from 12 standard sizes in three- and four-panel configurations for new construction and retrofit projects.

"Milgard is very proud and excited to introduce this new moving glass wall system and we believe it will be a popular addition to any home," said Brian Jones, Vice President of Marketing for Milgard Windows & Doors. "The simplicity of moving a wall allows homeowners to easily reconfigure spaces to extend their living areas to the outdoors, while the design complements other Milgard windows and doors for a beautiful home package. And, we've specifically developed Milgard Moving Glass Wall Systems to be obtainable by a wider range of homeowners – all backed by Milgard's history of excellence in design and customer service."

Milgard Moving Glass Wall Systems are available in a variety of aluminum colors with an option for clear vertical grain Douglas fir or pine interiors. There are several standard sizes available with three- or four-panel configurations that include a fully weather-stripped structural interlock system. There are two Low-E glass options, including Milgard SunCoatMAX® glass, a specialty glass coating for improved energy efficiency in both summer and winter.

Milgard Moving Glass Wall Systems beautifully integrate with other Milgard windows and patio doors for a unified look throughout a home. Unlike some other glass wall systems, the new Milgard offering is easy to open and close due to tandem stainless steel ball bearing rollers. With the touch of a finger, homeowners can easily open up and extend any living space.
